Art Unit: 1761

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 21, 2005 has been entered.

2. Claim 1 is objected to because of the following informalities: In claim 1, each of steps (a) - (d) should begin with a small character letter, e.g. "Providing" (step (a)) should be "providing". Also, "C⁰" (each occurrence) should be changed to "°C".

Appropriate correction is required.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dubanchet in view of Christensen et al.

Applicant is referred to paragraph No. 7, Paper No. 032504.

5. Applicant's arguments filed July 21, 2005 and the accompanying Rule 1.132 Declaration have been fully considered but they are not persuasive. Although applicant may use a lower temperature than Dubanchet when mixing the meat with the olive oil, it

Art Unit: 1761

is expected that the antioxidant benefits of olive oil would be preserved at lower temperatures. It appears that not only is a low temperature, during addition of olive oil, critical to achieving applicant's results, as set forth in Table 2 of the declaration, but also so is the use of liquid olive oil as opposed to solid olive oil. However, neither applicant's specification nor applicant's claims recite the use of "liquid" olive oil. Additionally, applicant's claims do not preclude the use of other components in combination with the olive oil when the olive oil is added to the meat, as occurs in Dubanchet.

Further, applicant's comments on page 2 of the declaration, that olive oil globules are formed and trapped in the meat in a direct way and that olive oil globules must be finely dispersed in the meat matrix, are more specific than applicant's claims, which do not recite such limitations.

6. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 1761

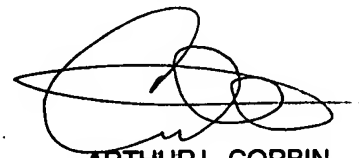

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
